PROJECTS & COLLABORATIONS

MUGbibigay Pag-asa

- Designed and integrated a custom logo, promotional graphics, banners and product images for online platforms.
- Managed social media accounts, posting content regularly to showcase products.

YummyTea

- Collaborated with a team to develop an automated food ordering system using C++, ensuring efficient functionality for ordering. Implemented core features such as order processing, total cost computation, and receipt generation.
- Contributed to design an intuitive Graphical User Interface (GUI) to enhance user experience by incorporating visually appealing elements such as buttons, icons, menus, and color schemes to improve aesthetics, resulting in an interactive and user-friendly ordering process.
- Ensured the GUI is responsive and accessible for all users.

Kinaiya

- Web design of the Top three (3) tourist destinations in the Philippine Island: Luzon, Visayas, and Mindanao.

- Collaborated with a team to design the website's layout and aesthetics based on Instagram's user-friendly style to create a familiar and engaging experience.
- Conducted usability tests to identify and resolve performance issues, ensuring smooth browsing and interaction.

Personal Web Portfolio

- Created a fully responsive portfolio website using HTML, CSS, and JavaScript to highlight my background, projects, skills, and contact information.
- Designed a user-centric layout, ensuring compatibility with various devices and screen sizes for seamless navigation.
- Implemented dynamic features, including hover animations and interactive navigation.
- Styled the website with modern design principles using CSS, integrating animations and transitions for enhanced interactivity.
- Link: <https://desvinluan.github.io/portfolio/>

SaEco

- Application design of waste segregation with AI recognition.
- Contributed to designing the user interface using Figma, creating intuitive and visually appealing layouts to ensure accessibility and ease of use for diverse users.
- Documented system architecture, user workflows, and technical specifications for project presentation and implementation.

Game Development

- Contributed to designing and documenting games developed using Pygame, focusing on gameplay mechanics, user interactions, and visual aesthetics.
- Designed engaging game elements, including character animations, level layouts, and in-game interactions, to enhance player experience.
- Incorporating sound effects and background music for an immersive gaming experience.

Course Enrollment System

- Contributed to the development of a course enrollment system, focusing on creating a seamless and user-friendly experience for students and administrators.
- Designed and integrated a custom school logo for the website, enhancing its visual identity and professional appearance.

TECHNICAL SKILLS

- **Web Development:** Basic Knowledge of HTML, CSS and JavaScript.
- **Database:** Basic Knowledge of MySQL.
- **Programming Languages:** Basic knowledge of C++, Java, Python, and PHP.
- **Graphic Design:** Proficient in creating visual designs and UI/UX layouts using tools like Figma and Canva.

- **Social Media Management and Content Creation:** Managing social media platforms, creating content, and engaging with audiences to enhance brand visibility.
 - **Productivity Tools:** Profficient in MS Suite (Word, Excel, Powerpoint) and Google Workplace (Docs, Sheets, Slides).
-

SOFT SKILLS

- Open to new ideas and willing to learn new ways of doing things.
- Independent and self-reliant but also a team player.
- Able to lead a team and work well in a team.
- Flexible mindset for workplace flexibility.
- Skilled in time management and capable of handling multiple tasks simultaneously.
- Effective under pressure, maintaining focus and delivering results in high-stress situations.
- Organized and able to prioritize tasks to meet deadlines.
